PROJECT PATTERN
LEATHER BEER CARRIER

Printing Instruction

The pattern is designed to be printable. We took into consideration the standard printer margin for letter & A4 sized papers.
Select “US letter” or “A4” under paper size. Make sure portrait mode is selected.
Be sure to click “scale: 100%” to ensure that the page is going to print to scale.

Recommended Leather

Weight: 3.6mm~4.0mm(9~10oz) | Strap width: 20mm

Instruction

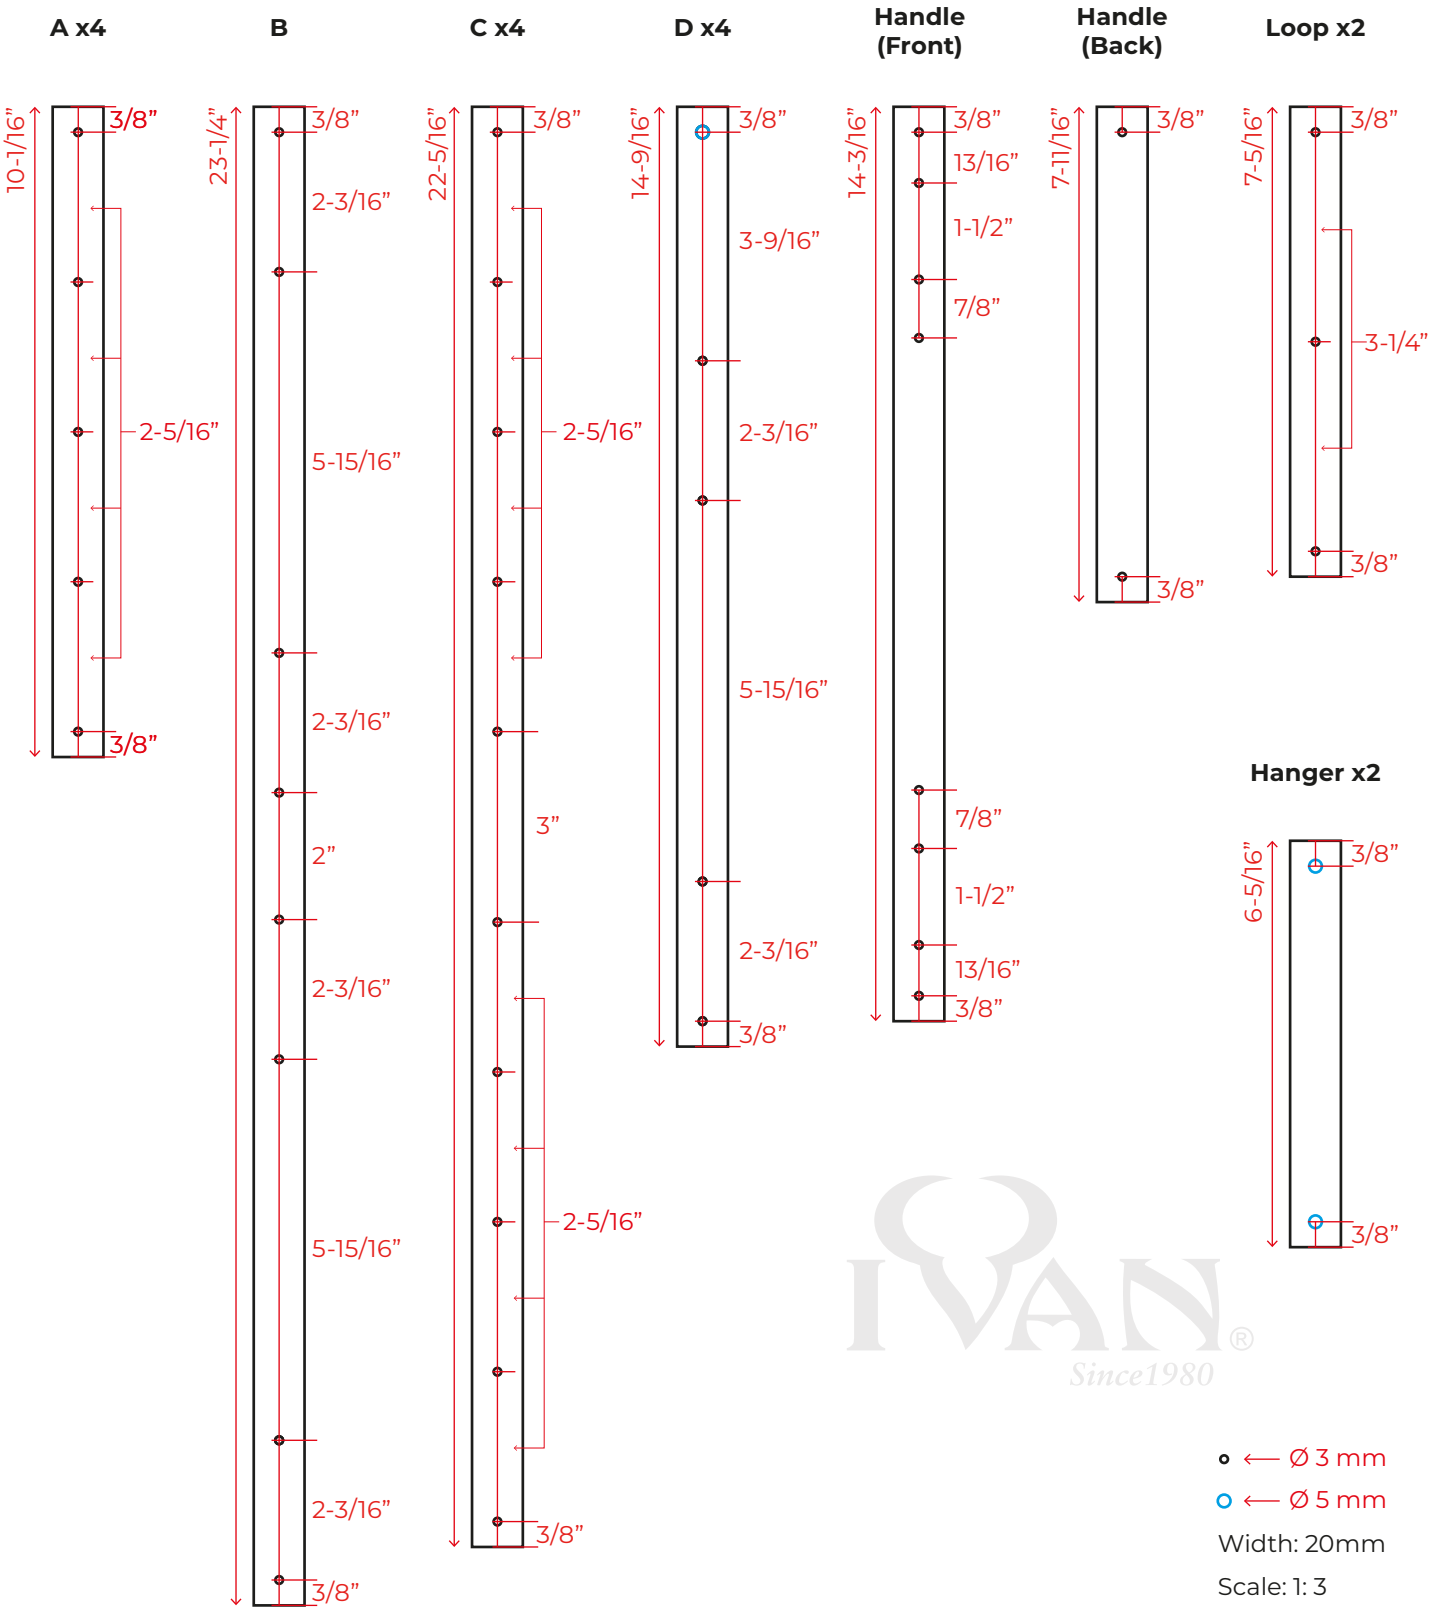

1. Take your leather straps, measure their lengths, mark the hole positions, and cut them to length according to the pattern. Then, set them aside.
2. Use a Mini Punch Set to make 3mm and 5mm round holes in all the leather straps.
3. Loop 2 A straps and align the holes. Then fold the B strap in half and insert it through the middle of the two loops. Align the middle holes and secure the straps with #12 Heavy Weight Rivets & Burrs using a setter.
4. Make a second set of the A straps in the same way and attach them to the second hole position on the B strap.
5. Fold and align the remaining holes on the A and B straps, then attach them together to complete the assembly. Set the component aside.
6. Fold the ends of the C strap inward and align them with the middle holes to form two round loops. Fasten them with rivets & burrs. Repeat the same step to make a second loop strap.
7. Insert the ends of two D straps into the C loops, align the holes, and secure them with rivets & burrs.
8. Pull the ends of the D straps through the round loop, align them with the central hole, and secure them with rivets & burrs to complete the handle component.
9. Repeat Steps 6 to 8 to assemble a second handle component.
10. Connect all three components together.
11. Apply glue to the back and front of the handle, attach them together, and gently curve the handle to shape it.
12. Fold the loop to overlap the ends. Place the handle over the loop, aligning with the 2nd and 3rd holes at the end of the handle, and secure them with rivets & burrs. Repeat the same step to complete the other side of the handle.
13. Finally, attach the handle to the carrier by inserting the D strap through the handle loop and secure it with screw posts to complete the assembly.
